Khaw Zhe Kang (Mark)

Kuala Lumpur, Malaysia | zhe991023@gmail.com | LinkedIn | GitHub

SUMMARY

Pre-sales Cloud & AI Solution Architect with hands-on experience in technical discovery, proposals, PoCs, RFP/RFI support, and cross-functional solution coordination for Southeast Asian customers. Translate business and technical requirements into scalable cloud and AI architectures. Practical GenAI experience includes Wan 3.0 video generation, LLM, multimodal and voice-AI demos, RAG, model routing, customer PoC support, and Model Studio/API troubleshooting. Bilingual in English and Mandarin Chinese.

EXPERIENCE

Solution Architect **Aug 2025 - Present**

Alibaba Cloud *Kuala Lumpur, Malaysia*

- Own technical discovery, architecture guidance, and PoC scoping for SMB customers across Indonesia, Vietnam, and Malaysia, covering cloud architecture, AI service adoption, feasibility assessment, and internal resource alignment at a high-volume ratio of **1 SA to 15 Business Development Managers**.
- Advise customers on IaaS/PaaS trade-offs across compute, networking, storage, containers, databases, migration, security, scalability, performance, cost, and operational feasibility.
- Act as the technical liaison among customers, business development, and China-based product and delivery teams, clarifying requirements, constraints, dependencies, owners, and next steps to keep opportunities moving.
- Verified cloud architecture for a Korean customer expanding into Indonesia, reviewing a redesigned deployment using Transit Router, ALB, multiple VPCs, and NAT Gateway.
- Supported a Vietnam education customer replicating its production architecture to a second region, including migration planning and ACK-based GPU cluster deployment discussions.
- Contributed to the team's early sales growth, with two major customer engagements projected to reach **five-figure USD monthly cloud consumption** at full scale.
- Spoke at two **GenAI Fund-led events in Vietnam**, presenting Alibaba Cloud GenAI adoption patterns, Model Studio capabilities, Qwen-based application demos, and cloud AI use cases to regional ecosystem audiences.
- Supported commercial discovery and solution discussions for **Wan 3.0 video-generation** use cases with digital-content customers, covering model capabilities, API/demo validation, adoption feasibility, and responsible-content considerations.
- Drove customer adoption of Model Studio voice-AI capabilities, including Qwen-TTS and CosyVoice, through hands-on testing, demos, and customer PoCs; helped validate model suitability and debug Model Studio/API usage, model behaviour, and application-integration issues.

Cloud Solution Architect **Feb 2025 - Aug 2025**

Huawei Cloud *Kuala Lumpur, Malaysia*

- Led customer consultations, architecture deep-dives, solution demonstrations, and PoCs for enterprise accounts, converting complex requirements into feasible cloud solution designs.
- Produced technical proposals, quotations, and architecture recommendations across compute, networking, storage, security, scalability, performance, deployment planning, and cost considerations.
- Supported RFP/RFI responses and partner-led opportunities, coordinating technical inputs across regional teams in Africa and China while clarifying solution scope, dependencies, risks, and delivery assumptions.

Business Systems Analyst **Jan 2024 - Feb 2025**

Intel *Penang, Malaysia*

- Supported finance data analytics initiatives by bridging finance accountants, dashboard builders, and business managers across reporting workflows.
- Validated SAP/SAP HANA data pipelines across Snowflake, Azure Databricks, Azure, and Azure Data Factory, including data logic checks, Databricks function support, and workflow verification.
- Helped improve finance dashboard reliability by identifying data quality issues, confirming transformation logic, and aligning Power BI outputs with stakeholder reporting needs.

Data Scientist **Jun 2021 - Jul 2022**

Shimano Components (Malaysia) Sdn Bhd *Pekan Nanas, Johore, Malaysia*

- Built analytics workflows using Alteryx, Excel, Python, and PowerPoint to support manufacturing and HR decision-making.
- Led a 5-person machine learning initiative for recruitment screening, including data preparation, model development, and business presentation; developed a decision-tree classifier achieving over 90% accuracy for candidate evaluation support.

TECHNICAL SKILLS

Cloud Architecture: Alibaba Cloud, Huawei Cloud, AWS EC2/RDS/S3, compute, VPC/networking, load balancing, NAT, Transit Router, storage, databases, containers, ACK/Kubernetes concepts, cloud migration, security, scalability, performance, cost optimization
Pre-sales & Proposals: Technical discovery, solution architecture, architecture workshops, solution demos, PoC scoping, proposal writing, RFP/RFI support, deployment planning, requirement clarification, risk and assumption tracking, stakeholder communication
AI Platform & Voice AI: Model Studio, Qwen, Qwen-TTS, CosyVoice, LLM APIs, multimodal and speech-AI workflows, RAG, model routing, GenAI demos, customer model testing, PoC support, API and integration troubleshooting, GPU cluster deployment discussions
Data / ML: Python, PyTorch exposure, basic model training experience, Streamlit, LangChain, Chroma DB, Azure Databricks, Azure Data Factory, Snowflake, SAP HANA, Power BI

EDUCATION

Master of Computer Science, University Malaya, GPA: 3.77/4.0 **2022 - 2025**
Relevant coursework: Advanced Algorithms, Advanced Machine Learning, Cloud Computing

Bachelor of Computer Science (Honours) in Data Science, Tunku Abdul Rahman University of Management and Technology **2019 - 2021**

CERTIFICATIONS

Alibaba Cloud Certified Professional: Cloud Architect | Dec 2025
Alibaba Cloud Certified Associate: Generative AI Engineer | Oct 2025
AWS Certified Solutions Architect - Associate | May 2025
